

## The RoHS Guidelines - In Brief

As you are probably already aware, the 'RoHS' Directive (2002/95/EC) bans the placing of Electronic Equipment on the European market, that contain amounts of the following substances above set maximum concentration values:

- ⊗ Lead (Pb)
- ⊗ Mercury (Hg)
- ⊗ Cadmium (Cd)
- ⊗ Hexavalent Chromium (Cr VI)
- ⊗ Polybrominated biphenyl (PBB)
- ⊗ Polybrominated diphenyl ether (PBDE)

- The regulations become enforceable on the 1st July 2006.
- In response to the EC Directive, BLP plans to change all the products that are affected to be RoHS compliant by the end of 2005.
- The following list identifies all BLP parts that are currently compliant and always have been i.e. these parts have undergone no changes to make them RoHS compliant.

All information has been taken from the DTI Government Guidance Notes on the "RoHS Regulations" - Consultation Draft - July 2004. This guide is an informative guide with no legal authority.

You are advised to refer to the Regulations yourself for the full legal requirements and in case of any doubt take independent advice, including your own legal advice.
